

A2 Aluminium Lectern

Product Specification

Materials

Body, Frame, Legs made from aluminium.

Artwork printed on a solid 3mm backing panel and coated with a clear scratch resistant lacquer.

All fixings are stainless steel & tamper proof.

Painted using epoxy base coat and a satin polyester powder coat to finish.

Dimension

Viewable area is A2 (594mm x 420)

Lectern frame has an assembled thickness of 42mm

Installed height of between 1.0 - 1.4m (to top of frame).

Maintenance

Clean off graffiti using a mild solvent, testing in an inconspicuous area first.

Damaged paintwork should be patched as soon as possible.

Check that the side fixings haven't become loose over time.

Check that concrete footings have not degraded.

A2 Aluminium Lectern

Installation Notes

The lectern should have a minimum space of 500mm either side and behind for future servicing and cleaning.

The height can be adjusted to suit the location, and intended age or demographics of the potential readers.

Installation Method

Quick setting concrete (postcrete) can be used. Footings should be approx 300 x 300mm and 600mm deep.

Legs can be cut down if necessary, with a hacksaw.
